

About Fuji Heavy Industries Group

Business Overview

Our Products Represent Our Commitment to Helping as Many Customers as Possible Lead More Fulfilling Lives

FHI is a transportation manufacturer, with automobiles—under the SUBARU brand—as core products, and operates the following three business units.

SUBARU Automotive Business

Leveraging Original Technology to Deliver Cars that Realize “Enjoyment and Peace of Mind”

Since we released the SUBARU 360 in 1958, we have been contributing to the development of Japan’s automobile industry. We adopted a horizontally opposed engine for the SUBARU 1000, launched in 1966, and released the world’s first-ever 4-wheel drive passenger car in 1972. Since then we have produced unique cars equipped with original technology, including the establishment of a symmetrical power train featuring a horizontally opposed engine as the “Symmetrical AWD.” Moreover, we have developed the advanced driving support system “EyeSight” and a new generation transmission, the “Lineartronic CVT.” We are thus constantly taking on new challenges in pursuit of “Enjoyment and Peace of Mind.”

SUBARU

Confidence in Motion

Brand Statement

Through “Confidence in Motion,” SUBARU aims to meet customer expectations for the freedom and fulfillment enabled by SUBARU’s uniquely satisfying driving experience.

Location

- Gunma Manufacturing Division (Ota City, Isesaki City, and Oizumi Town, Oura District, Gunma Prefecture)
- Tokyo Office (Mitaka City)

Aerospace Company

Leveraging Tradition and Innovative Technology to Develop and Manufacture a Range of Aircraft

Aerospace Company inherits its technologies and spirit of aircraft manufacturing from its predecessor, Nakajima Aircraft. Now, It has established unparalleled technologies in many categories, such as its expertise in developing aircraft structures, including composite materials for main wings, IT technology for unmanned aircraft, and sophisticated system integration combined with flight control technology. In addition to developing and manufacturing helicopters, fixed-wing aircraft, and unmanned aircraft, this in-house company also participates in development and production of large passenger aircraft. Based on the original technology cultivated to date, the Aerospace Company constantly takes on challenges in new fields aiming to develop into an aircraft manufacturer with a global presence.

Industrial Products Company

Mass Production of General-Purpose Engines That Can Be Used under Any Conditions on Earth

The Industrial Products Company develops and manufactures general-purpose engines used in construction, industrial, and agricultural machinery and high-performance engines used in snowmobiles and buggies as well as finished goods that are engine-powered, such as generators and pumps. Our Robin general-purpose engines, widely known for their yellow bodies, have earned a worldwide reputation as tough dependable power sources that underpin local infrastructure and are suited to a multitude of applications and usage environments ever since the launch of the M6 in 1951. We now provide a lineup of more than 2,000 Subaru general-purpose engine models, which are exported to more than 100 countries and regarded as a reliable brand worldwide.
