## Key Points

#### Results for FYE 2023

• Production: 874,000 units (up 20% y/y)

While production constraints continued throughout the fiscal year, mainly due to the semiconductor shortage, **global production increased year on year** as the company worked to minimize the impact through measures such as flexible rescheduling of production plans.

• Operating profit: 267.5 billion yen (up 196% y/y)

As steady sales, led by the key U.S. market, and the positive effects of the weak yen offset the significant impact of raw material cost increases, **operating profit increased year on year**.

- Forecast for FYE 2024
- Production: 1,010,000 units (up 16% y/y)
   While production constraints are expected to continue, mainly due to the semiconductor shortage, the Company will increase production volume to the pre-Covid level of 1,000,000 units through various initiatives.
- Operating profit: 300 billion yen (up 12% y/y)

While the negative effects of the stronger yen and the impact of raw material cost increases are expected to continue, **the Company aims to achieve operating profit above the pre-Covid level** with expected sales growth led by the key U.S. market.

Repurchase and Cancellation of Own Shares Repurchase and cancellation of own shares (Aggregate repurchase amount: up to 40 billion yen)
