Export total *3	50,028	+31.5%	3rd consecutive months of increase	277,516	-6.8%

☆: July record

**< Production >**

- Domestic production increased due to a significant increase in Forester production, which offset an impact of changes in plant operation schedules continuing since November 2018.
- Overseas production increased as the plant had 6 more working days than the same month of the previous year because its summer shutdown timing was different.

**< Sales in Japan >**

- Passenger vehicle sales increased, driven by the fully-redesigned Forester launched in July 2018 and the Subaru XV which newly added "e-Boxer"-equipped models to its lineup in October 2018.  
(e-Boxer: Subaru's newly-developed power unit system combining a horizontally-opposed Boxer engine with an electric motor, which offers enhanced environmental performance as well as Subaru's distinctive driving enjoyment.)
- Mini vehicle sales increased led by the Pleo and other models.

**< Exports >**

- Exports from Japan increased due mainly to increased shipments of the Forester.
