

**Production Adjustment at Manufacturing Facilities in Japan due to Spread of COVID-19
(Information as of April 27, 2020, Japan time)**

As previously notified, Subaru Corporation is currently suspending operations of its Gunma Manufacturing Plant due to the global spread of COVID-19, with plans to resume on May 11.*

As infection prevention measures such as stay-at-home orders around the world are impacting our supply chain and sales activities, production at the Gunma plants will be adjusted after the reopening on May 11.

* News releases dated April 1 and April 6

Production adjustment at Gunma Manufacturing Plant:

May 11–29, 2020

- Main Plant and Yajima Plant (Automobiles):

Operations to be reduced to a single shift from the originally-scheduled double shifts.

(To operate first shift only)

- Oizumi Plant (Engines and transmissions):

Operations to be reduced in proportion to reduced production of the Main and Yajima plants.
